

We're in a mission to produce the next generation of top tech talents in Bangladesh.

This is a placement and career boost program by MasterCourse. We take a group of aspiring Data Scientists and in the next 1 year, we prepare them to get 1 lac taka per month salary jobs.

How it works:

1. 3 months of rigorous training on the fundamentals of Data Science.
2. We help you place in Jobs both locally and globally through our placement channels
3. We continuously groom for 1 year even after getting the job so that you can maximize your salary in this period

Benefits of our Program:

1. 0 upfront fee. You pay us nothing until you get a job or a salary hike. If you don't secure a job that pays you 3.6 lac BDT per annum after completing the program, you don't have to pay us anything. We benefit only if you succeed.
2. Access to our global and local placement channels for direct remote and on-site job opportunities.
3. Access to mentors who are in this field currently doing your dream jobs
4. Community of data scientists

Contents: Recorded class, Live Class, Projects, Assignments, Mock Interviews, Tests

Program fee:

1. 15% of your monthly salary when you start getting 35 thousand BDT per month until the program fee (100,000 BDT) is paid in full.

This means the whole 1-year program fee is 100,000 BDT but you don't have to pay the full 100,000 BDT all at once. You just share 15% of your monthly income for ~ 8 to 12 months.

This method is called Income Sharing Agreement. It's quite popular in the US and even India but hasn't been practiced in BD yet.

We want to create an opportunity for BD students.

What else do we demand from you: Your sincere dedication

Application:

Right now we're accepting applications for the program. We've already received hundreds of applications from different channels. However, due to our constraints, we cannot accept everyone. Extremely sorry for that. We'll accept only 20-30 promising candidates for the current cohort/batch. If you don't get selected now, you can apply for future cohorts.

Conclusion: This is a new model in Bangladesh. But we strongly believe this model will make a great positive impact in Bangladesh's higher education system and the job market. That's why we're passionate about building this company and striving to make this model successful. Join us if you too believe in our mission and vision! Let's make Bangladesh unstoppable together!

Screening Process:

- Phase-1: Primary Application
- Phase-2: Assignment
- Phase-3: Final Interview

If you are asking the same questions or any other ones, let's have a chat. You can set up 15 minutes meeting from the link given in the mail.

We also want to encourage you to share this opportunity with your data-enthusiastic friends & colleagues.

Hope to talk to you soon.
